Basic Construction Services undergoes a name change

In April 2009 Chevron Construction Company Pty Ltd T/a Basic Construction Services changed its name to Probuild Civil (QLD) Pty Ltd.

Probuild Constructions (Aust) Pty Ltd acquired a controlling interest in Chevron Construction Company (Pty) Ltd in December 2003, catalysing a four fold growth in turnover over the next four years.

Melbourne based Probuild Constructions, is a well respected and significant player in the Building Construction Industry and has branches in Perth and Sydney, as well as an interest in a civil engineering construction company, CECK, in Perth.

As part of a national growth strategy, the aligning of the various company names within the Probuild group was seen to be important, to create a unified, country wide identity for the growing construction group.

This name change is seen as creating an opportunity for the company to embark on the next stage of its planned growth strategy.

The culture of providing a good, reliable, quality and honest service will remain as the foundation of the company's vision and core values.
